Monday - 9 May 2022

Agenda: Sprint retrospective meeting

Location: Online

Date: 2.05.2022

Time: 17:00

Attendees:

- Manar Al-Robayi

- Radu Constantinescu

- Ahmed Ibrahim

- Lucian Negru

- Kendra Sartori

Points of action last week

1. Frontend

    - created the home page and order review page of the React application

    - this still needs css and some minor functionalities in order to be more aesthetically pleasing

2. Backend

    - no result has been reached with the heuristic approach yet, so that will probably be the main focus for next week

3. Configurations

    - The database is now set up using Postgresql

    - Django is now configured and is working with the database

4. Code base

    - the code for what has been done this week can be found on the main branch

- we will merge into this branch every Monday, so that the work for each Sprint can be found there before the weekly Sprint Retrospective meetings

Notes
